Pedestrian & Vehicle Detecting and Warning Camera

with Blind Spot information System

Pedestrians & Vehicle Detection and Warning

170°

Large Viewing Angle

Audio
Alarm Output

1080P

IP69K Waterproof
& Shock Resistant

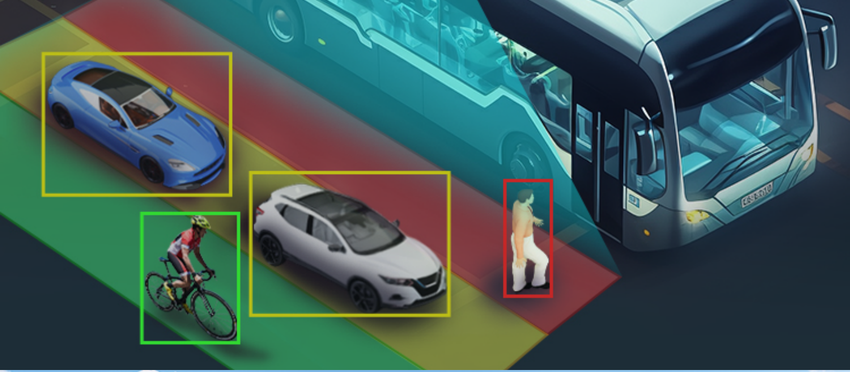
Why do you need

Pedestrian & Vehicle Detecting and Warning Camera?

Large vehicles are facing dangers caused by blind spots. Traffic accidents might happen if vehicles come across motorcycles or sudden pedestrians when changing lane or making a turn.

Pedestrian & vehicle detection, intelligent driving assistance

Detect vehicles and people around such as cyclists, motocyclists, and pedestrians to assist large vehicle drivers in safe driving.



Supporting audio alarm output and real-time warning

Detecting pedestrians and vehicles and sending audio alarmSupport warning outside the vehicle (on some vehicles)

Compatible with central control screen, fit for multiple vehicle types

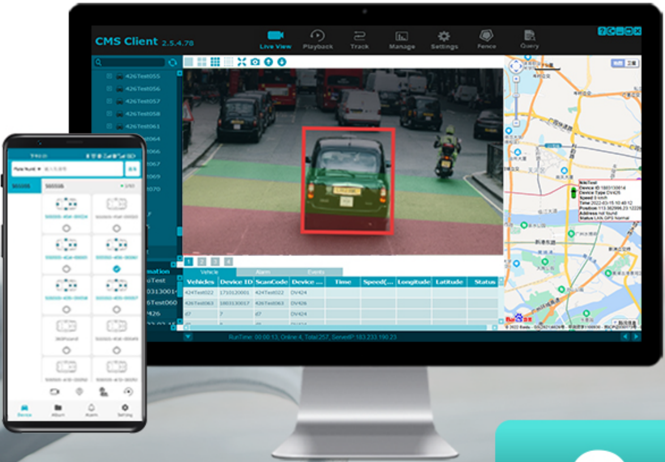
AHD/CVBS/100M ethernet output

RTSP

ISO17215

And other network protocols

Pedestrian & vehicle detection camera combined with MDVR



Vehicles	Device ID	ScanCode	Device ...	Time	Speed(...	Longitude	Latitude	Status
424Test022	1710120001	424Test022	DV424					
426Test063	1803130017	426Test063	DV426					
d7	7	d7	DV424					

RunTime: 00:00:13, Online:4, Total:257, ServerIP:183.233.190.23

It can record the video of pedestrian & vehicle detection and upload the alarm events to the remote server at the same time.

IP69K, dustproof, shockproof, weatherproof and durable in use

Adjustable Lens

for flexible installation

Widely used in various commercial vehicles

Truck

Bus

Transport vehicle

Forklift

Construction machinery

Sediment trucks
