

**CrushGrind®**  
DENMARK

## *BILLUND* GRINDERS

Introducing the upside-down grinder **Billund** made from biocomposite material. The Billund series is a fun, playful design inspired by the colourful building blocks of Denmark. It is based on a biocomposite material made of wood based cellulose fibres from certified, sustainably managed forests.

The material gives the products a warm, natural and earthy feel and has a low carbon footprint. Unlike crop-based biomaterials, this biocomposite doesn't interfere with a food-production chain.

The grinder is mounted with the patented mechanism from CrushGrind® where we offer **25 year guarantee** on the ceramic parts. It grinds both salt, pepper, dried herbs and most spices.

**MASALA**  
RRP: €35

**PAPRIKA**  
RRP: €35
