One espresso coffee maker for all

The La cupola espresso coffee maker, a miniature monument so to speak, symbolizes the exquisite dialectic relationship between architecture and the home that Aldo Rossi has traced over the years. An espresso coffee maker that is simultaneously a temple, tower and basilica celebrates the coffee ritual and follows the dream of a domestic environment that is a planned and constructed analog to urban space. It is an icon of contemporary industrial design, now available in a version suitable for induction hobs and, as with the

original edition, in two color variants: with a black or blue handle and knob.

ESPRESSO COFFEE MAKER
LA CUPOLA
DESIGN BY ALDO ROSSI

DEDICATED TO

All those who love good Italian coffee made with an Espresso coffee maker and who want to appreciate an icon of modern design every day.

Aldo Rossi

BIO

Aldo Rossi is considered one of the most important Italian architects of the second half of the twentieth century. A dramatist of abstraction, reduction and brevitas, his rigorous language of primary forms, geometries and evocations through absence has created some of the most intensely poetic works of architecture and design of his era. He was the first Italian designer to win the prestigious Pritzker Architecture Prize, and he designed iconic products for Alessi such as the La conica coffee maker and La cubica pot.

QUOTE

“For me, the coffee maker is a kind of construction: a dome supported by a cylinder with certain struts, more or less functional and decorative, but always also precise architecture.” Aldo Rossi

Espresso coffee maker

ESPRESSO COFFEE MAKER

Cast aluminium. The magnetic steel base is also suitable for induction hobs. Handle and cap made of thermoplastic resin, black or blue. Only available with a 6-cup capacity.

DESIGN NOTES

Iconic

This espresso coffee maker was designed in 1988 by Aldo Rossi, the creator of some of the most iconic objects of the 1980s. It proves that great designers are always able to adapt to the tastes of the public.

For every day

With its elegant and timeless design, La cupola is a coffee maker for everyday use: it is Rossi's answer to the classic espresso coffee maker and an attempt to realize his dream of a coffee maker for everyone.

Made of aluminium

Housing made of cast aluminium, an excellent heat-conducting material that gives the espresso an unmistakable, full-bodied and round taste.

USE AND MAINTENANCE

EASY TO USE

Fill the boiler with cold water not exceeding the lower edge of the safety valve. Insert the funnel filter into the boiler and fill with ground coffee without pressing too hard. Use coffee ground not too finely: the boiling water should pass through it effortlessly but slowly, soaking up all the flavor. Place the coffee maker on the heat source. When you have finished brewing, remove the lid from the body of the pot and stir the coffee with a teaspoon so that the one that came out first, which is thicker, mixes with the less full-bodied one that came out later. Close the lid again and pour the coffee into the cups.

VERSATILE

Suitable for gas and induction cooktops, electric and glass-ceramic hobs.

EASY TO CLEAN

Wash with hot running water and a nonabrasive cloth. Do not wash in the dishwasher.

EASY TO MAINTAIN OVER TIME

When using on a gas stovetop, set the flame as low as possible to preserve the rubber seal for a long time, prevent the handle from being damaged and the boiler from unsightly blackening. In case of wear or damage, you can replace: the handle and knob and their screws; the funnel filter, rubber gasket, microfilter and safety valve.
