China

FEATURE

Maximize your workspace with this BPA-free cutting board.

Break free from traditional non-slip feet or edges that hinder cutting efficiency.

Its triple-layer design offers limitless color combinations to reflect your brand’s uniqueness, with the middle layer made from GRS-certificated recycled material promoting sustainability and carbon reduction goals.

The built-in non-slip surfaces on both sides ensure stability during use, while integrated juice grooves catch liquids, keeping your countertop dry and clean.

The reversible design doubles the cutting area, with a two-tone look to avoid cross-contamination.

Fine-tuned hardness is gentle on blades, reduces hand fatigue, and minimizes cutting noise.
