Scope : AIRVANCE Group

Introduction

Since its creation in 2020, AIRVANCE Group has been committed to providing innovative solutions in the air treatment and ventilation sector (HVAC) for buildings. Today, more than ever, energy transition and sustainability are major challenges for our industry. Within the Group, we consider these challenges as opportunities to reinvent ourselves and drive innovation even further.

Our commitment is based on three essential pillars: customer satisfaction, employee well-being and the preservation of our planet. As a key player in our industry, we have a responsibility to develop ever more efficient solutions while integrating tomorrow's social and environmental expectations.

As a 100% family-owned company, we have always believed our people to be one of our most valuable assets and integral to our growth. This belief will continue to be fundamental to our Group, which is firmly focused on innovation, to build one of the leading ventilation groups in Europe.

Thanks to the commitment of the men and women who make up the Group, and to our ever-expanding international presence, AIRVANCE Group is ready to meet the needs of the market and to anticipate the changes that lie ahead. Together, we are convinced that we can contribute to creating a healthy and secure indoor environment for all, with the smallest possible environmental impact.

Laurent DOLBEAU, AIRVANCE Group CEO

Our mission

We contribute to a healthy and safe environment for all.

AIRVANCE Group is a designer, manufacturer, and distributor of air treatment and insulation systems for buildings. Closely aligned with our customers' needs, we design and deliver services and products that combine comfort, air quality, and energy performance.

Our activity

Tertiary buildings

- Offices
- Medical Practices
- Nursery
- Schools and colleges
- Senior living facilities
- Hotels
- Stores
- Sales offices

Residential

- Collective
- Individual

Industry

- Clean rooms
- Shooting ranges
- Transport warehouses
- Automotive
- Agrifood
- Mechanical
- Metallurgy
- Paper
- Plastics and Chemicals

Professional kitchens

- Collective kitchens
- Commercial kitchens
- Shows
- Dark kitchens

Healthcare

- Operating theatres
- Recovery rooms
- Sterile rooms

582 millions

€ turnover (2023)

75 000

customers

Our expertise & brands

AIRVANCE Group offers a wide range of products and solutions to support all our clients in their projects.

Air diffusion

Heating, air conditioning and heat pump

Fire protection and smoke extraction

MCV

Energy recovery and air handling units

Networks and support

Ventilation

Filtration and air quality

Digital solutions

Our brands

AIRVANCE Group markets a portfolio of brands dedicated to indoor air quality and energy performance across Europe.

France Air
The Air Architects

Air treatment, ventilation, and diffusion solutions for commercial buildings, industrial facilities, professional kitchens, and healthcare provisions.

CAIROX
IMPROVING AIR BECAUSE WE CARE

A wide range of air treatment, ventilation, heating, and cooling solutions to meet the needs of commercial and residential buildings.

SUFIX

Systems and accessories for fixing, anchoring, and supporting ventilation installations, hydraulic, electrical, and refrigeration networks.

Manufacturing Activity

10 plants
in Europe

5 R&D
centres

- Industrial facilities using the latest technologies to improve productivity
- Major network of European suppliers
- Our own laboratories to test our products

International key player

94

points of sale

5 000

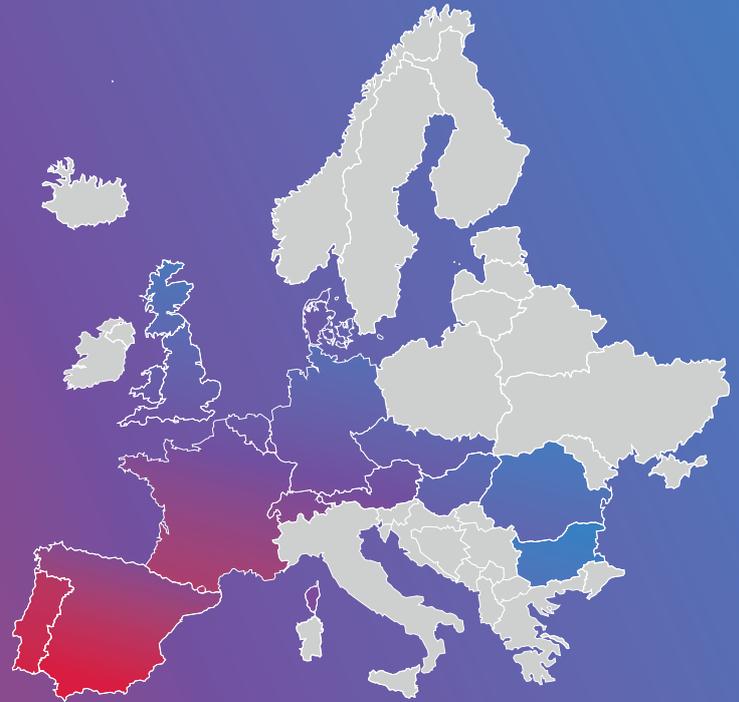

engineering offices

140 000m²

of local storage

420

sales people

Thanks to our presence throughout Europe, we are close to our customers and their needs. Our mission is to support and enhance the work of building professionals by simplifying their daily tasks and striving for excellence through technological innovation, services, and personalised support

Expert catalogues

E-commerce sites in each country

Online selection tools

Customer service

Click & Collect services available 7 days a week, 24 hours a day

A fleet of delivery trucks

Innovation & environment

patents

at the heart of our product design

Committed to the fight against climate change, AIRVANCE Group places creation and innovation at the service of indoor air quality, the energy performance of buildings, and the reduction of the environmental impact of our products and activities.

Plumbox®,
Revolutionising Air Diffusion
While Reducing Its Carbon
Footprint by 80%.

PLUMBOX® is a plenum entirely made from recyclable textile materials sourced from manufacturing scraps of textile diffusion ducts, significantly reducing the environmental impact of projects by 80% compared to traditional plenums. Lightweight, compact, and easy to install, PLUMBOX® saves valuable time for installers while ensuring effective and uniform air diffusion.

R-Covery®,
The new generation of energy
recovery units combining
optimal comfort and reduced
energy bills

The R-COVERY® range of dual-flow air handling units is designed with an ECM fan and a Eurovent-certified aluminum plate heat exchanger to efficiently recover heat or cold from extracted air to preheat or cool incoming fresh air. This technology helps maintain a stable temperature for better occupant comfort, reduces heating and cooling needs, and lowers the a building's electrical consumption as well as energy bills.

PandO2,
A digital solution to measure
and optimise indoor air
quality

A digital solution capable of measuring and diagnosing indoor and outdoor air quality (indices and forecasts, pollutant concentrations, weather conditions, pollen levels, and alerts from air quality monitoring organisations). It ensures optimal indoor air quality and allows for real-time monitoring and reporting of measurements taken by indoor air quality sensors. Additionally, it enables the management of remediation measures to assess, anticipate, and reduce the effects of pollution.
