

# The best drinking water from your own tap

Your Swiss expert for guaranteed clean and beneficial water

SWISS MADE & ENGINEERING

✓ Sustainable

✓ Pioneering

✓ Swiss

ONLY ONE WATER, BUT THE BEST

# The Perfect Drinking Water Treatment

## EVOfilter plus

EVOfilter + EVOcharge

3,200 CHF

The guaranteed best and most sustainable filtration on the market.

### Advantages

- + 0.9–1.1 liters per minute flow rate
- + Direct cell availability
- + More oxygen in the water
- + Fresh mountain spring taste

### Filtration of all contaminants

- ✓ The only filter on the market that completely eliminates and does not just reduce contaminants!
- ✓ Verified laboratory and test reports

## EVOfilter premium

EVOfilter + EVOcharge + EVObooster

4,200 CHF ~~4,600 CHF~~

Maximum water quality

The EVOfilter plus is additionally complemented with our hydrogen generator EVObooster for even healthier water.

### Additional advantages:

- + High hydrogen content
- + The benefits of Evodrop's hydrogen water have already been tested in several studies by independent laboratories
- + There are over 1,200 studies worldwide on the subject of hydrogen

### Maintenance costs

- ✓ Maintenance after 10,000 liters or at the latest after 5 years with a water hardness of up to 40° fH
- ✓ 499 CHF replacement kit
- ✓ 699 CHF replacement kit including maintenance by Evodrop
- ✓ 999 CHF replacement kit including maintenance by Evodrop and 5-year warranty extension

### Installation costs

Installation is carried out by our specialist staff or a partner near you and costs a flat rate of 500 CHF including VAT and includes materials, labor, service vehicle, and commissioning.

### Warranty

The manufacturer's warranty is 5 years. Additionally, a 30-day money-back guarantee is provided for all product costs.

# Your Everyday Benefits

## Uncompromisingly Clean

Evodrop eliminates all harmful substances and contaminants. This has been verified and tested by accredited laboratories.

## Thirst sensation

Efficient hydration creates a natural feeling of thirst and you can easily drink 2 liters of water a day.

## Soft Taste

The water has a light and soft taste. It is not heavy and provides a refreshing sensation.

## Health

Water can fulfill its function as a solvent, transport and detoxification agent effectively and unhindered.

## Full Power

Studies show that water has a constructive influence on performance, fitness, recovery and

## Environmentally Friendly

A family of four can save up to 2,000 PET bottles, reducing the CO2 footprint by approximately 0.6 tons per year.

## Never Carry Bottles Again

Save time and energy by not having to carry heavy crates. The best water comes directly from your own tap.

## No More Limescale

Since limescale is completely eliminated from the water, you increase the lifespan of water-using appliances.

**30-Day Money-Back Guarantee**

**Installment payment plan up to 24 months available**

**5-Year Manufacturer Warranty**

**Comprehensive Service - From consultation to installation**

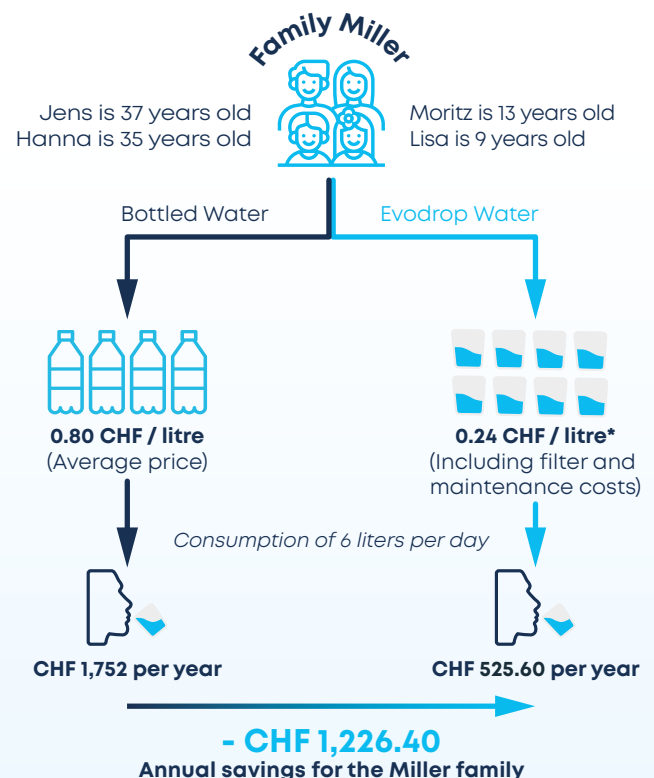

# Save Money with Every Liter

The complete filter system pays for itself after just under 3 years in the case of the Miller family in this example.

An investment in an effective water treatment system, which may seem expensive initially, pays off not only in terms of health benefits but also significantly relieves your wallet.

### \*Calculation of the liter price for Evodrop water

1. Filter costs amortized over 10 years  
 $\text{CHF } 4.200 / (365 \text{ days} \times 10 \text{ years}) = \text{CHF } 1.15$
2. Maintenance costs (filter replacement every 5 years)  
 $\text{CHF } 499 / (365 \text{ days} \times 5 \text{ years}) = \text{CHF } 0.27$
3. Price of tap water in Zurich  
 $(\text{CHF } 1.75 / 1,000 \text{ liters}) \times 6 = \text{CHF } 0.01$   
 $(\text{CHF } 1.15 + \text{CHF } 0.27 + 0.01 \text{ CHF}) / 6 \text{ liters} = \text{CHF } 0.24$

As the total cost per liter amortizes, the price per liter becomes increasingly cheaper the longer and more frequently the system is used.

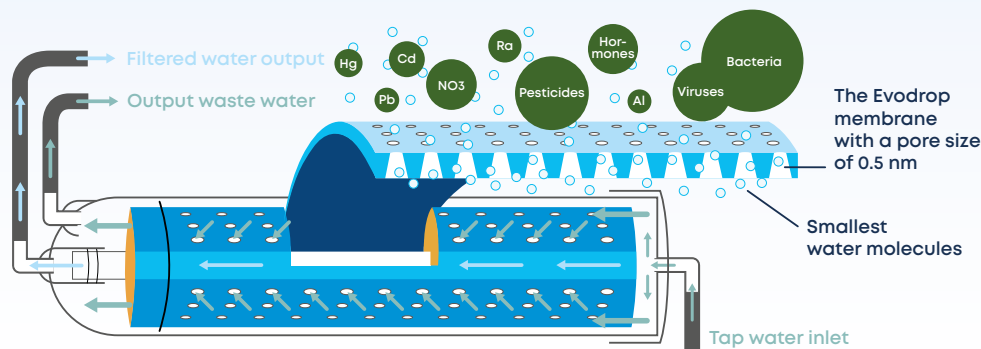

# EVOfilter

## Purest water thanks to Orbital Osmosis® Technology

The filter eliminates over 614 contaminants and limescale completely from the water through its patented Ultra-Nano membrane with Orbital Osmosis® Technology, which has been proven to be unrivaled.

Our Ultra-Nano filtration is based on a more effective filtration process compared to similar membrane systems. It is crucial to understand that essential trace elements remain in the water, and the EVOfilter provides consistent filtration performance throughout the lifespan of the membranes.

As a result, the EVOfilter is low maintenance, requires minimal consumables, and offers the highest protection for you and your loved ones.

- + Reliable filtration of all contaminants
- + No more limescale problems in household appliances
- + Maintenance only after max. 10,000 liters
- + Easy filter replacement thanks to bayonet locks
- + Various integrated control mechanisms

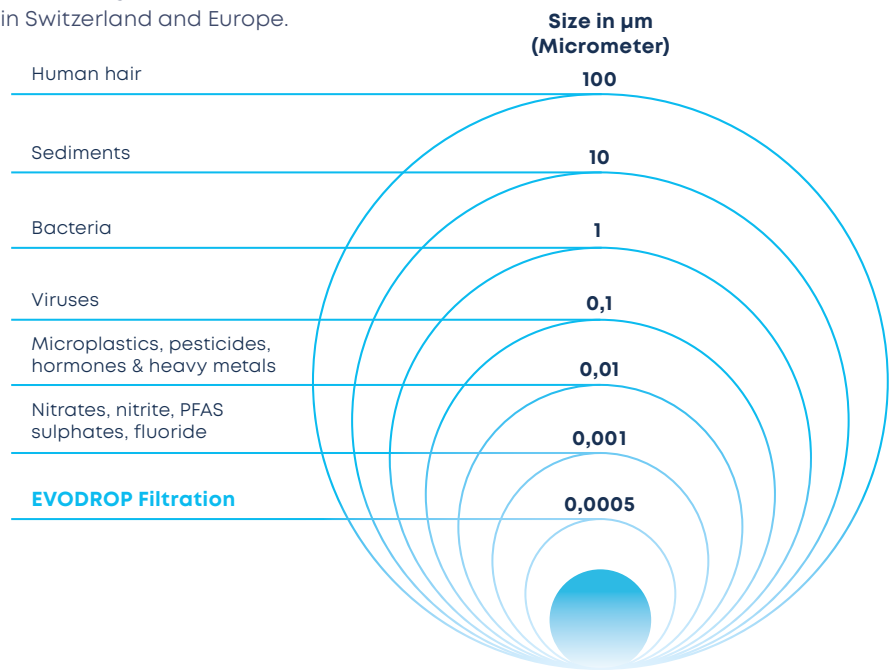

**Width** 108 mm (with angle mounting: 118 mm)  
**Height** 415 mm (with water connections: 430 mm)  
**Depth** 415 mm

## Uncompromisingly clean

The EVOfilter has been tested for various foreign and harmful substances at various laboratories in Switzerland and Europe.

- ✓ Pharmaceutical residues
- ✓ Hormonal residues
- ✓ Bacteria and viruses
- ✓ Nitrate and nitrite
- ✓ Heavy metals
- ✓ Microplastics
- ✓ Glyphosate
- ✓ Antibiotics
- ✓ Hormones
- ✓ Fungicides
- ✓ Pesticides
- ✓ Herbicides
- ✓ Sulfates
- ✓ Fluoride
- ✓ PFAS
- ✓ ...and many more!

# EVOcharge

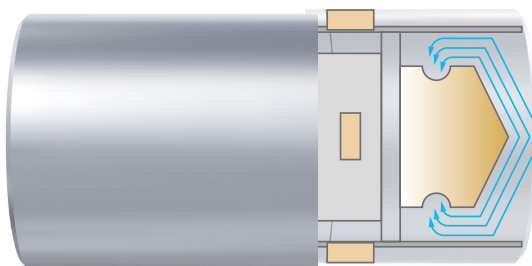

## Soft and Healthy Drinking Water

It simulates approximately 15 to 20 kilometers of the natural flow path of spring water, allowing the water to bind with more oxygen. Consequently, the water tastes softer and more palatable, akin to natural springs where the water is constantly in motion.

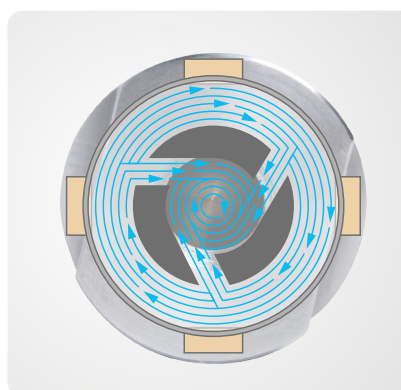

The water gains conductivity, solvency, and natural vitality through strong flow dynamics. This vibrational balance ensures active exchange among water molecules, and our body cells directly absorb the refined water. Thus, the water becomes the most effective thirst quencher.

Made from  
high-quality V4A  
stainless steel.

The patented algorithm and specially developed geometry of the EVOcharge cause the incoming water to rotate at 3,000 revolutions per minute.

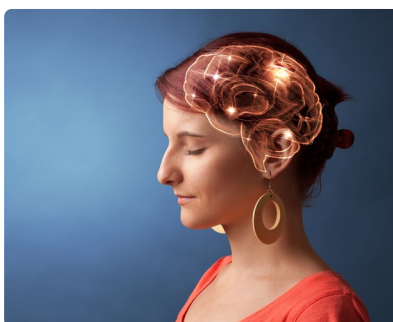

- + Patented rotation process
- + More oxygen in the water for a softer taste
- + Unleashes the full flavors of coffee and tea
- + Direct cell availability of the water
- + Completely maintenance-free, thanks to the unique algorithm

### Solvency

Solubility is one of the most important factors for water in our body. Water transports substances into our cells and enables cell metabolism and detoxification.

### Conductivity

All cognitive functions are guided by water. This conductivity therefore affects all electromagnetic impulses of our nervous system.

### Soft taste

Through the restructuring of molecular water clusters, the water can bind with more oxygen again. This results in a velvety soft taste.

# EVObooster

## Hydrogen - a fascinating element

The EVObooster enriches the water with molecular hydrogen. After the EVObooster, there is a large amount of molecular hydrogen (H<sub>2</sub>) in the treated drinking water.

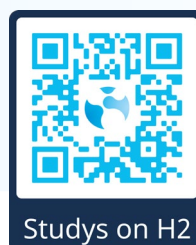

As hydrogen is the smallest element in the periodic table, it can penetrate every cell and have an effect at cellular level. Due to its ability to bind with free radicals, hydrogen is a hot topic in medicine and science.

EVObooster

Independent studies by Evodrop and over 1,200 studies by independent institutes worldwide point to the positive effects of hydrogen.

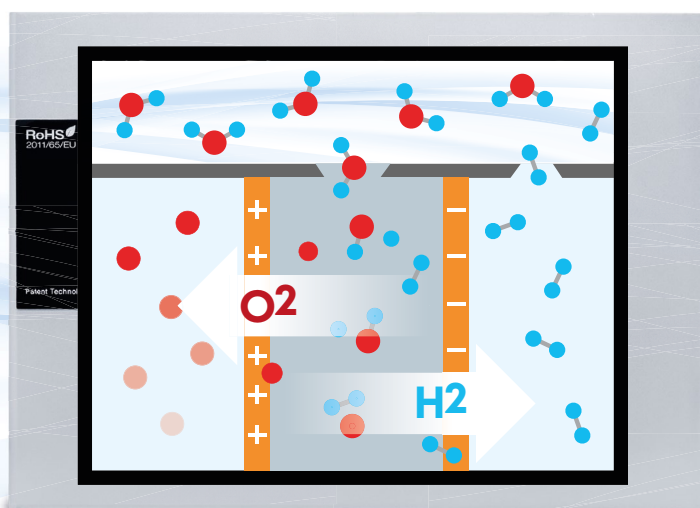

Studies on H<sub>2</sub>

Width 260 mm  
Height 185 mm  
Depth 100 mm

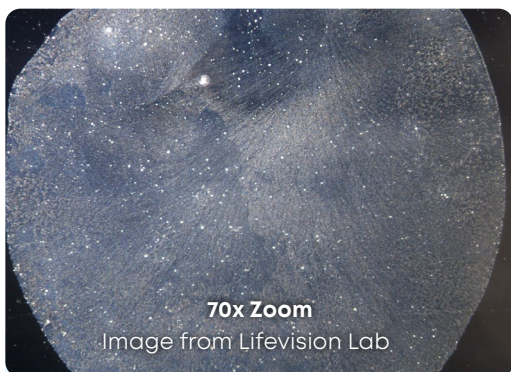

## Amazing effect

The patented process separates hydrogen molecules from oxygen molecules and, unlike ionizers, the pH value of the water is not distorted. The pure molecular hydrogen is added to the water.

Hydrogen (H<sub>2</sub>) is distributed in the body after drinking in the mitochondria of the cells, where energy is produced. There it can bind with harmful radicals. The binding of hydrogen with the so-called hydroxyl radicals produces water again, which is simply excreted from the body.

# Tested and Certified

## Without Evodrop

Sample: Tap water Zurich (Altstetten)

## With Evodrop

Sample: Tap water Zurich (Altstetten)

Using the Soyana method, the Swiss research laboratory LifevisionLab was able to demonstrate the strong organizing power of water treated with Evodrop compared to conventional tap water.

As can be seen from the pictures, the study shows a clear improvement in the quality of the water after treatment.

## Further Certifications:

## The scientific verifiability of our system benefits is our top priority.

On the following QR code you will find all studies on the Evodrop systems as well as all general studies divided into the product categories.

### Filtration proof by a recognized Swiss laboratory:

The filtration efficiency of Evodrop membranes has been successfully confirmed by the renowned Swiss laboratory. This confirmation underscores the high quality and efficiency of the membranes in terms of their filtration performance, meaning they can reliably and effectively eliminate particles.

### Filtration depth and PFAS elimination by SRCMB:

The European laboratory Scientific Research Center of Medical Biophysics has proven that the membranes can reliably filter particles down to 0.55 nanometers. Particularly noteworthy is the effective removal of PFAS (per- and polyfluorinated alkyl substances) by Evodrop membranes.

### Safety assurance verification by Eurotest Control Laboratory:

The water report conducted by the respected Eurotest Control Laboratory confirms the compliance of the filtered water with legal drinking water standards. Both physical-chemical and microbiological tests were conducted, and the water meets the highest standards of the drinking water regulation.

### Europe's largest safety certification for materials in contact with food:

All components have been certified by the Sialab laboratory in accordance with the MOCA directive. It has been confirmed that no harmful or environmentally damaging substances are transferred to the water.

Other laboratories have tested our systems for various advantages:

## Awards and Honors

**Green Product Award**  
Winner 2024

### Green Product Award 2024

60,000 votes from 18 countries chose Evodrop among 250 nominated products in the Sustainability / Innovation category.

CorporateLiveWire  
**SWITZERLAND**  
PRESTIGE AWARDS  
2020 WINNER

### Prestige Award 2020

Evodrop was delighted to receive the 'Water Filter Specialists of the Year!' award from the renowned Switzerland Prestige Awards in 2020.

### SEAL AWARD 2021

In late 2018 and 2021, Evodrop was honored with the SEAL Award for outstanding sustainability and environmental initiatives and products.

### Worldcob CSR 2020

In 2020, Evodrop proudly received the prestigious 'Worldcob CSR' certification for highly sustainable corporate concepts.
