Timely  
delivery  
of goods

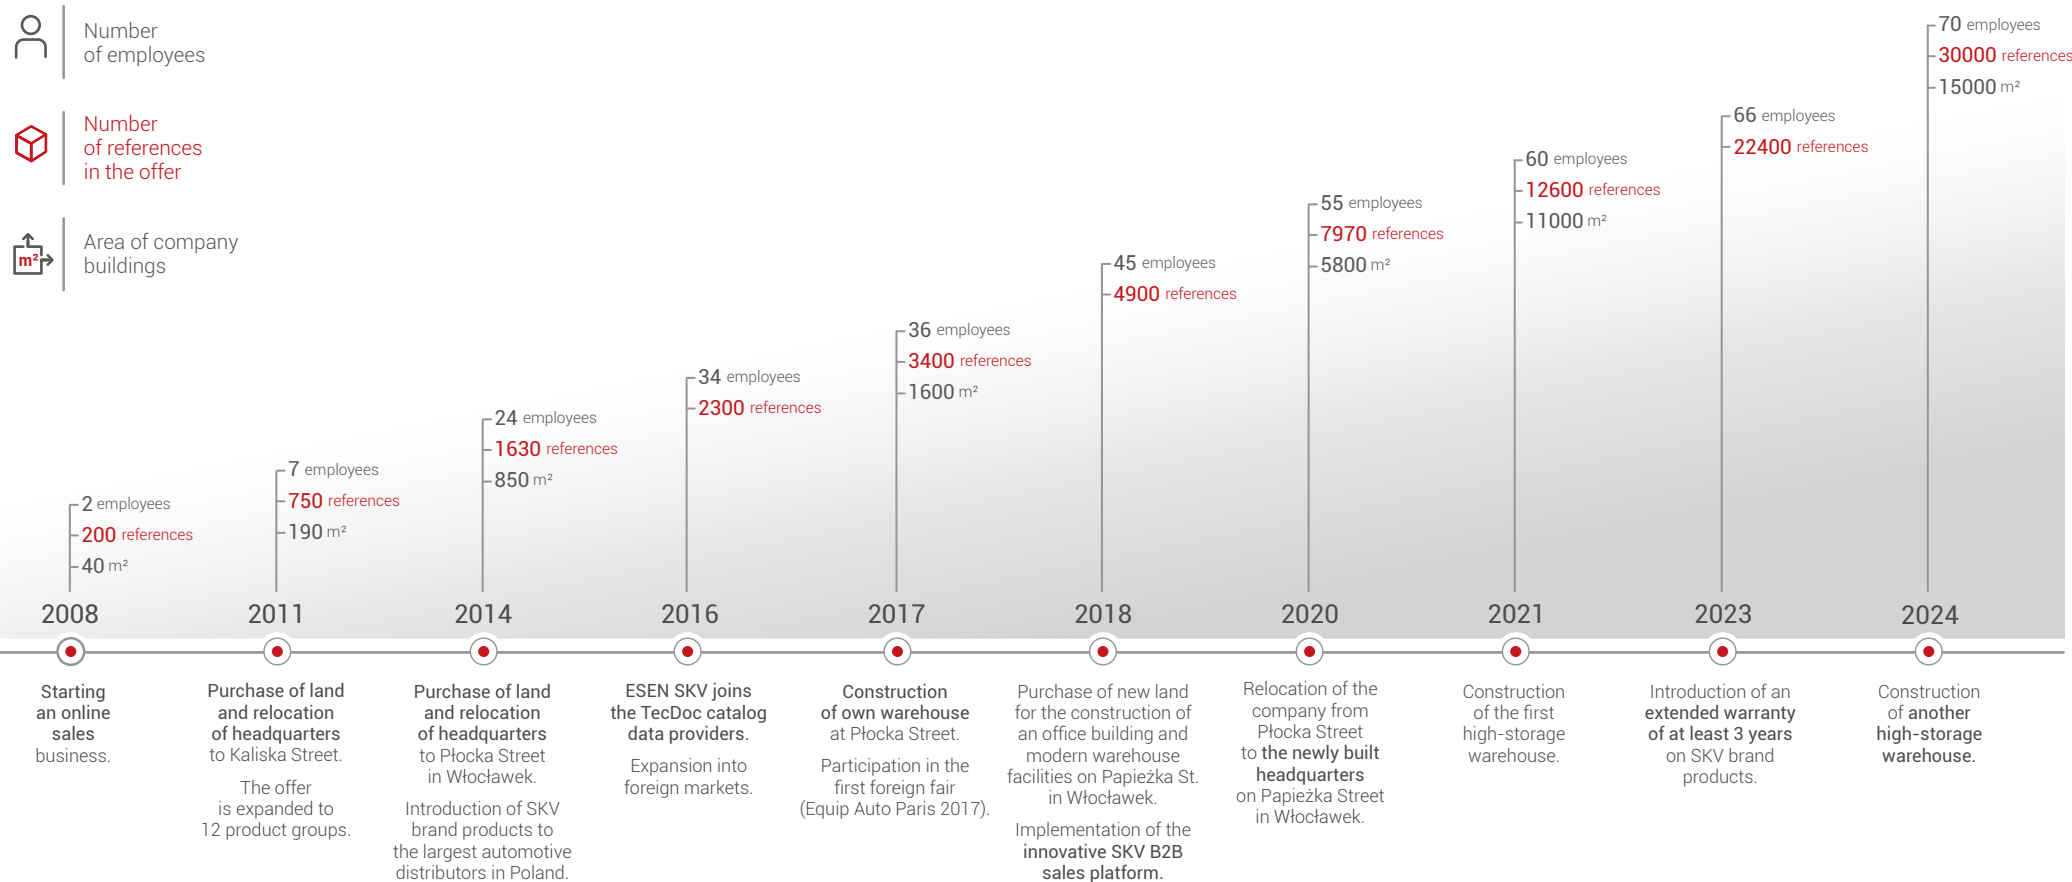

ESEN, the owner of the Auto Parts SKV brand, **has been operating since 2008 and currently employs 70 skilled workers** with extensive experience, constantly seeking new talents.

The Auto Parts SKV brand introduces **over 500 new models of parts monthly**, with nearly 30,000 references currently available.

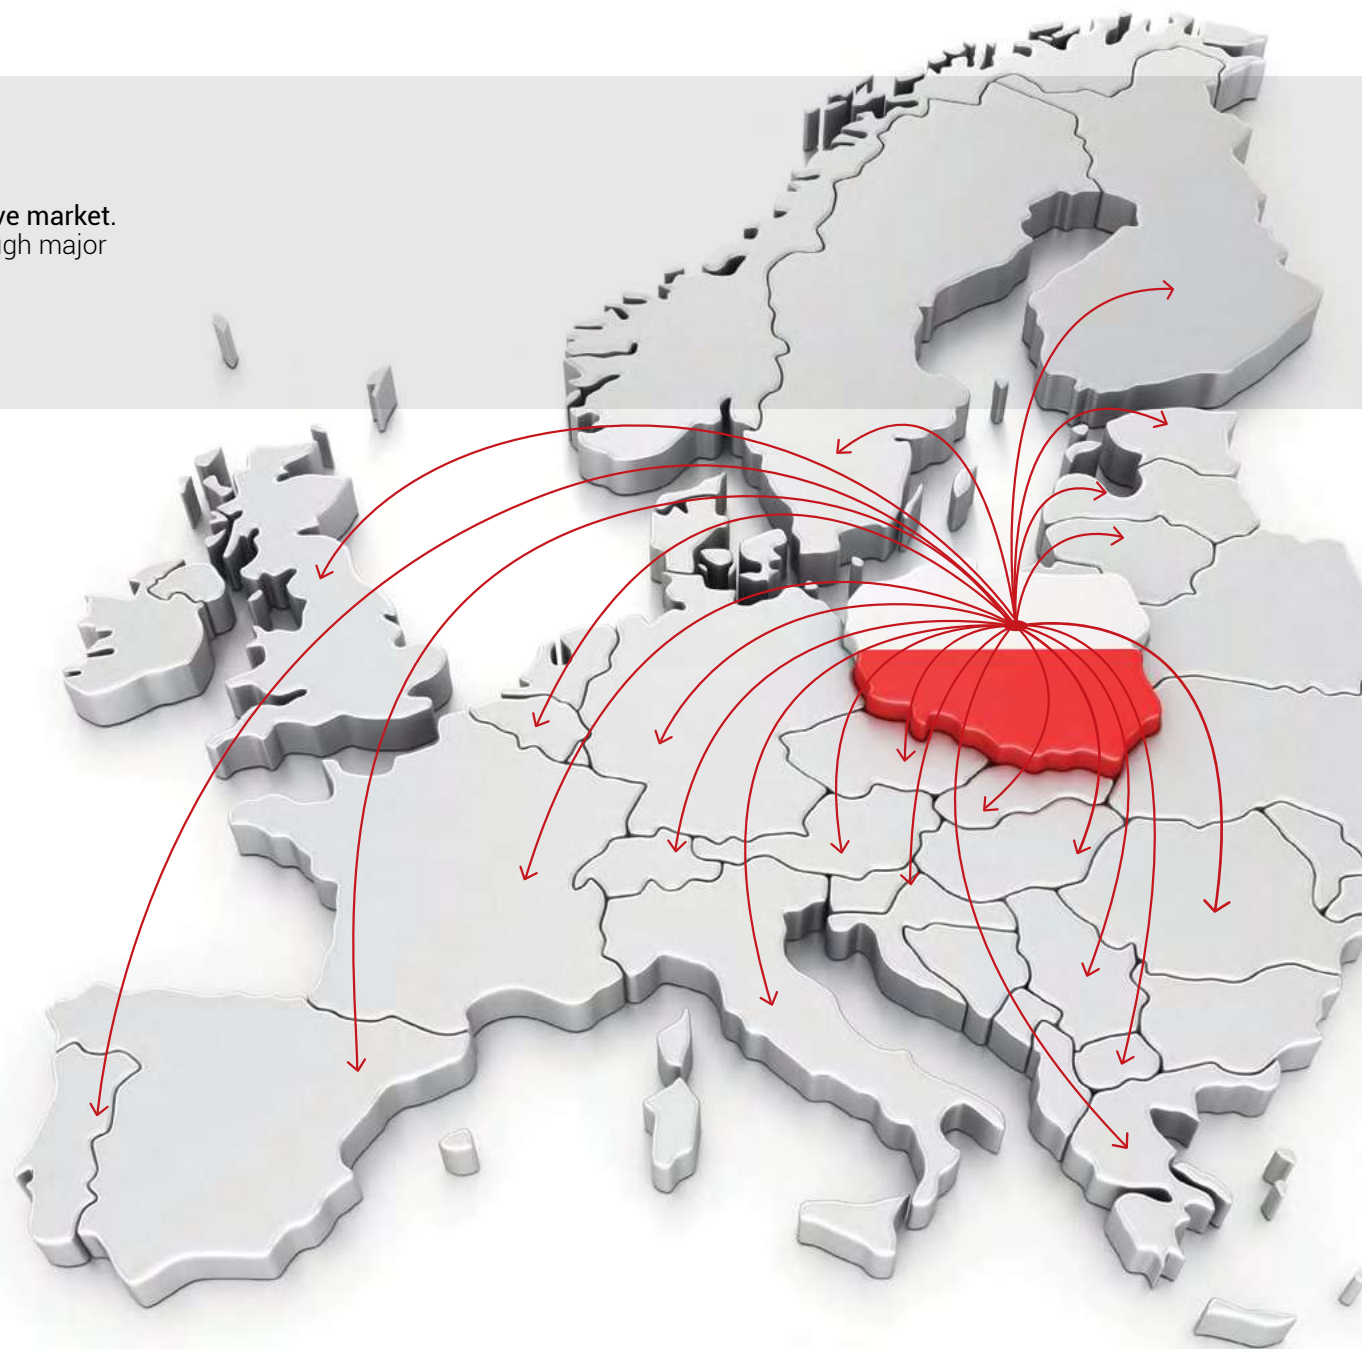

## SKV DISTRIBUTORS

SKV is a leader in the domestic automotive market. SKV's automotive parts are available through major distributors across Europe.

ESEN distribution center is located in central Poland, which provides **an optimal logistical solution**, ensuring that the offered goods always arrive on time.

SKV is a dynamically growing brand owned by ESEN company.

The high level of knowledge and expertise of the company's employees, combined with their extensive experience in the automotive industry, **enables the reliable fulfillment of customer expectations.**

By continually expanding product range, ESEN offers a wide variety of SKV products (nearly 30,000 references across more than 100 product categories) with a **96% availability rate.**

The attractive offer and collaboration with companies throughout Poland and across Europe have resulted in **dynamically increasing sales of SKV products in recent years.**

The SKV brand is a certified TecDoc data provider.  
TecDoc ID: 4969

## ESEN HEADQUARTERS

In June 2021, the construction of ESEN's new headquarters was completed, and it was awarded the title of "Most Beautiful Building of 2021 in Poland".

orders  
warehouse

## SUPPLIER AND GOODS LOADING CONTROL

Production  
control

Quality  
control

Loading  
supervision

The success of the SKV brand is primarily due to the quality of its products at affordable prices. Production in the factories is systematically monitored by SKV employees.

Audits aim to maintain the highest norms and standards for the automotive parts offered.

To ensure the best possible prices for all customers, SKV opened an office in China, which is responsible for coordinating shipments using smart logistical solutions like the "no space waste" approach.

This allows SKV to reduce shipping costs, which have recently become a significant factor in the final product price.
