Light your fire!

Humble launches new wireless design lamp 'Firefly'

Amsterdam, january 2024 – The warm feeling and cosiness of a tea light is indispensable in many people's interiors. Humble has managed to capture this enchanting atmosphere of candlelight in a new wireless design lamp. Safe, durable and easy to move. The firefly that appears to be under the shade provides a subtle light accent and shadow play. So 'light your fire' anywhere and anytime with Firefly!

Firefly is dimmable (three settings), available in two variants (bronze or gold colour) with a frosted or smoked shade. All lamps are waterproof IP65-certified: so you can leave them outside!

Humble Firefly | available from March | from € 149

Atmosphere, anywhere

At Humble, we develop wireless lamps that stand out for their design and create the perfect atmosphere. After all, the right lighting transforms any room into a home; both for individuals and professional environments such as the hospitality industry. All our designs revolve around long-term use and modern conveniences. Wireless charging, group remote control or

connection to smart home systems; Humble helps making your lighting experience both effortless and personal. And does something accidentally break? Then our lamps are very easy to repair by yourself or with our help.
