

Radar Life Detector Shines at Intersec, LSJ Technology Opens a New Chapter in Emergency Rescue

From January 14th to 16th, 2025, Intersec-The World's Leading Trade Fair For Security, Safety And Fire Protection will be grandly held at the Dubai World Trade Centre. Beijing LSJ Technology Development Co., Ltd. will make a blockbuster appearance with its advanced radar life detectors and other products, showcasing cutting-edge technologies in the field of emergency rescue. As a distinguished national high-tech enterprise, LSJ Technology focuses on researching and developing emergency rescue equipment. Its independently developed radar life detector has reached the international advanced level. Based on UWB pulse signals, it is specially designed for disaster rescue. The device features an integrated design, which is portable and easy to use. It can detect and locate living beings from a long distance without contact, obtain two-dimensional coordinates in real-time, conduct full-area scanning and intelligent identification, with precise positioning, strong penetrability, anti-interference ability, and the ability to adapt to harsh environments, providing a solid guarantee for rescue work.

LSJ Technology will display its profound technical strength and innovative achievements during the exhibition. Its R&D team gathers elites from multiple fields, with postgraduate students or above accounting for 50% of the total. Numerous patents and academic achievements highlight its leading position in the industry. The company adheres to the innovation concept, constructs a complete rescue system, and provides high-quality solutions and services.

At this exhibition, LSJ Technology will showcase not only its radar life detector but also the three-dimensional wall-penetrating radar life detector. It is committed to communicating and cooperating with global industry professionals to promote the development of emergency rescue technologies.

We invite individuals from all sectors to visit our booth **[HALL 6, 6-G14]** at the Dubai World Trade Centre to witness the innovative capabilities of LSJ Technology

and explore the new future of emergency rescue solutions together.
