

NEW

# Grate news travels fast.

Say g'day to **Ograte**. A two-sided speed grater that works in a circular motion on one side, and up and down on the other.

## Straight line speed.

Top side blades grate in both an up and down motion for efficient grating, and features an extra-wide plane for large foods like cheese.

## Moves in the right circles.

Bottom side blades grate in a circular motion for speed grating foods like carrot and zucchini, and includes a guide rim for easy grating in either direction.

## Oh, snap!

Unique safety cover securely snaps on to protect both sides of the razor-sharp blades for worry-free storage in a drawer.

## Grate control.

Non-slip foot provides control while grating on flat surfaces, doubles as a scraper, and also hooks on to the edge of a bowl.
